CITIZEN

Loved by citizens, working for citizens.

History

Citizen was founded in 1930 in Japan, when Citizen Watch began production of its famous watches. It was the beginning of the creation of the Citizen Group, whose logo is now recognizable on all continents of the world. Over the last decades, thanks to innovations and the use of precise technologies, it has become a leading supplier of, among others, electronics including calculators.

Citizen System Europe

Citizen Systems is one of the Citizen Group companies that has been providing calculators and printers since 1964. In addition to the mother company in Japan, Citizen Systems Europe has sister companies in Hong Kong, China and the USA.

Why Citizen?

Quality, innovation, customer satisfaction and honesty are our corporate values.

QUALITY AND SAFETY in the case of Citizen means Japanese technology, know-how that guarantees high-quality components and materials. The ISO certificates held confirm the norms of processes related to production, sales and deliveries.

ECOLOGY: materials used for calculator housings come 100% from recycling. Powered by natural, solar energy, they have the Blue Angel® certificate. Strictly observed environmental policy, not using harmful chemicals, significantly reduces the emission of harmful gases and liquids, contributing to the elimination of smog.

CSR for Citizen means a well-thought-out strategy of engaging in the development of not only the global society and the local environment, but also commitment to the good of employees of the company and their families – which is referred to by the name Citizen.

EXPERIENCE: Citizen has been present on global markets for over 100 years. For three decades these unique Japanese calculators, characterized by interesting design and very high quality, set the standard in the premium segment of calculators: ecological, desktop, scientific, printing and pocket.

DESIGNLINE

CITIZEN ECO COMPLETE® = ECO⁵

- 1 = Blue Angel eco-certificate
- 2 = Solar powered – no batteries, no need to change batteries
- 3 = Casing made of 70 % recycled plastic
- 4 = Packaging and instructions made of recycled material
- 5 = Packaging completely compostable

The new Citizen Eco Complete® series is the new generation of impressively environment-friendly calculators.

Because green counts.
