GOTO FUNCTION

Jump to a particular calculation step by pressing one single button.

How to use GO TO function in Indian Comma Marker Calculators.

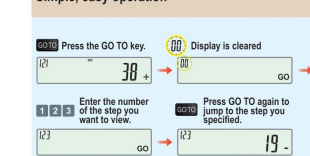

Step 1. Type 100+50+78+90+24+98+10+19+30+11+67+89+150+1000 on the calculator and we see 1,816 on the screen of the calculator. Screen shows the number of steps in the left top corner of the calculator which is 14 for this calculation.

Now suppose we want to change the number entered in the calculator in 7th step from 10 to 16.

Step 2. To change the entry of 7th step of the calculator press the [GO TO] key. Now type 7 to reach to 7th step and press the [GO TO] key again. Screen will show number 10.

Step 3. To change 10 by 16 press [CORRECT] key and type 16 and press the [CORRECT] key again and get it registered in the memory of the calculator. Now press [=] key to get the new result on the screen which is 1,822.

Financial Consultant
Versatile Calculator for all Professional to regular use

- Simple interest • Compound interest
- Investment Appraisal (cash flow)
- Amortization • General and function
- Statistical and regression
- Interest rate conversion
- Cost, selling price, or margin
- Day or date calculations
- Depreciation • Bond calculation
- Break-even point

Functional calculations

- Exponential / Logarithmic functions • Trigonometric / Inverse trigonometric functions • Hyperbolic / Inverse hyperbolic functions • Power/Power root • √
- Reciprocal • x! • nCr • nPr • Random number • Coordinate conversion

Depreciation

Depreciation can be calculated by the straight-line method, fixed percentage method, sum-of-the-year's digits method or declining balance method.

Statistical calculations

- n • x • 2x • 2n-1 • 2n • Standard deviation • Single variable • Regression (linear / quadratic / exponential / logarithmic / power / inverse numbers)

CURRENCY CONVERSION

Tax & Exch

HOW TO CHANGE CURRENCY RATE?

When you press the [MEX] key, it toggles between conversion mode and memory mode. You will see "EXCH" on the display when in conversion mode. C1, C2, and C3 are three conversion rates. C1 is your home country currency, and so it is always set to 1. C2 and C3 are rates for two other countries, which you can change. For example, if you want to set a conversion rate of \$1 to 0.95 euros, here is what you would do (using C1 for US dollars and C2 for euros):

1. Press [AC]
2. Hold [SET] (%) for about two seconds until "SET" appears
3. Press [C2] to select currency 2
4. Input the conversion rate (0.95) and then press [SET] (%) to store it in memory. You can check the currently set rate at any time by pressing [AC] and then [C2].

HOW TO PERFORM CURRENCY CONVERSION

If you want to convert 100 euros to US dollars, you would do the following (assuming you are using C1 for US dollars and C2 for euros):

1. Press [AC]
 2. Enter 100 and then press [C2]
 3. Press [C1] to convert to dollars
 4. To convert back to euros again, press [C2]
- You also perform a currency conversion within a calculation. How much in US dollars would five items selling at 100 euros cost?
1. Press [AC]
 2. Enter 5 × 100 and then press [C2]
 3. Press [C1] [=]

Example- Convert Rs. 100000 into U.S. Dollars at a conversion rate of \$ 1 to 48 rupees.

Answer-2083.33 U.S. \$

Steps-Press M/EX key which toggles between conversion mode and memory mode and bring the screen which show EXCH.

Use C1 for U.S. Dollars and C2 for rupees

Press [AC]

Hold [SET] (%) for about two seconds until "SET" appears

Press [C2] to select currency 2

Input the conversion rate 48 and then press [SET] (%)

Press [AC] followed by 100000 and then press [C2]

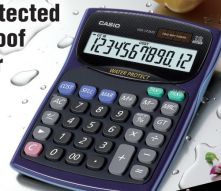

Press [C1] to get the result which is 2083.33

GT FUNCTION

GT

Automatic totalization of the results of different calculations.

Example- Mr. X visited a grocery store and purchased the following items whose details are given below in the table. What is the total amount paid by Mr. X to shopkeeper?

ITEM	QUANTITY	PRICE/KG (RS.)
SUGAR	3 kg	90
RICE	5 kg	200
PULSE	2 kg	300
MILK	2 ltr	80

Answer-Rs.230

Steps to be followed-
3×90 followed by = sign
5×200 followed by = sign
2×300 followed by = sign
2×80 followed by = sign

Press GT to get the total amount

MEMORY FUNCTION

(Available in all Calculators)

Memory function help you to do calculation in parts, and wants to save result of previous calculation for later use. There are three keys for this [M+], [M-] and [MRC]

KEY	FUNCTION
[M+]	Adds the displayed values into memory
[M-]	Subtracts the displayed value from memory
[MRC]	Displays the net memory; Reset the memory

TAX FUNCTION – How to set Tax Rate

TAX

Tax & Exch

TAX- GSTC

Type-1 – Calculators in which RATE SET written on the key of the calculator
Step1: Press and hold RATE SET key to set tax rate.
Step2: Press TAX+ key to change tax rate.
Step3: Change the tax rate and press RATE SET key.
Step4: If tax rate 4%, then 100 TAX+ = 104.

Type-2 – Calculators in which RATE SET written on the body of the calculator
Step1: Press and hold RATE SET key to set tax rate.
Step2: Now change the tax rate as per your need.
Step3: Again press RATE SET key to fix that tax rate.
Step4: If tax rate 4%, then 100 TAX+ = 104.

Example1. Mr. John purchased a watch for Rs.5000. What was the purchase price of the watch with an additional tax rate of 12.5%?

Answer-Rs.5625

Steps-Set the tax rate as 12.5%. Type 5000 and press TAX+ key to get the amount.

Example2. A calculator has a MRP of Rs.745. If the tax on the calculator is 4%, then find the basic price of the calculator without tax.

Answer-Rs.716.4

Steps-Set the tax rate as 4%. Type 745 and press TAX– key to get the basic price.

MARK UP (MU) FUNCTION

MU

Example- If cost price of a calculator is Rs. 480 and the shopkeeper wants a margin of 25% on selling price, then what would be the selling price of the calculator. Also find the margin.

Answer-Rs. 640 & 160

Steps- Type 480 Press the key (MU) followed by 25 Now press the sign (%) The screen will show the selling price as Rs. 640 To know the exact profit press equal sign (=) The screen will show Rs.160 as profit.
